

Example File for Articles adapted for IJAC

Author Name 1¹, Author Name 2¹, Author Name 3²

¹Graduate Program – University XXX – City – State – Country

²Department Name – Another Institution (ACRONYM) – City – State – Country

test1@uni.br, test2@uni.br, test3@uni.br

Abstract. *This is a dummy abstract. It describes the style to be used in articles and short papers for the IJAC journal. Abstracts should not have more than 10 lines and must be in the first page of the paper.*

1. Introduction

This file serves only as a reading and testing base.

It is configured to be executed one directory level above the abntex2 folder, requiring the package and bibliography calls to specify the relative path.

An example of a citation: (KNUTH, 1984)

For the bibliographic reference to work, remember to compile using BibTeX.

2. Literature Review

This area is reserved for the literature review.

This is an example of a line break.

An example of an image, in Figure 1.

Figure 1 – Just an example of a figure.

3. Material and Methods

Area for description of material and methods. Table 1 presents an example of a table.

4. Results and Discussion

This area is reserved for the presentation and discussion of the results.

Table 1. An example of a table

Column number 1	Column 2	Column 3
Row 2 Column 1	6.02	7.01
Row 3 Column 1	6.29	12.22
Row 4 Column 1	4.66	3.47
Row 5 Column 1	5.71	5.37

4.1 A subsection test

Adding a subsection here. Below, an example of a formula:

$$P(A|B) = \frac{P(B|A)P(A)}{P(B)} \quad (1)$$

4.2 Another subsection

Now, showing items:

- Item 1;
- Item 2;
- Item 3.

4.3 Presentation of Algorithms and Code

When it is strictly necessary to demonstrate the inference logic or feature extraction without resorting to formal pseudocode.

```
def calc_prob(var1, var2):

    if var1 > var2:
        return "Var1 is greater than Var2"
    return "Var1 is less than or equal to Var2"
```

5. Conclusion

Finally, the conclusion.
